

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove started out on a cross country RV expedition. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their trip, John reacquainted himself with past business associates along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could quickly and securely lift people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John formed a joint venture with two friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they created and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has extended itself into quite a few global markets and continues to cultivate new equipment to guarantee that customers are able to become safer and more well-organized within their workplace.
